**Directions to Energy Research Centre, Menzies Bldg, UCT Upper Campus:**

From the city, drive along De Waal Drive or Eastern Boulevard, passing Groote Schuur Hospital on the way. Just past the hospital the road forks. Take the right-hand fork (M3 to Muizenberg). Just beyond Mostert's Mill (windmill) on your left, take the Woolsack Drive/University of Cape Town turn-off (Exit 7 Rosebank - M89).

Turn right at the traffic lights on Woolsack Drive and go under the bridge and round a hairpin bend to the northern entrance of the campus onto Ring Road. Pass the Information Kiosk (on your right) and continue along Rugby Road toward the southern end of campus and pass through the access control boom. Turn right here, continuing up Ring Road, through a second boom.

From the southern suburbs the approach is along Rhodes Drive, where the southern entrance to the campus is clearly signposted from the left lane. Keep going up Ring Road.

**Parking near Menzies Building:**
After the second boom on Ring Road, look out for P11 & P12 (right), or P14 (on your left). You can also continue along the top of Ring Road, turn down South Lane to P10 (near Chemical Engineering and just above Menzies) or P15 (next to Environmental and Geographical Science).

The Energy Research Centre is on Level 6 of the Menzies Building.
Take left from the lift through a wooden door, take left again along a passage until you see a glass door with ERC written on it.
